New Feature Requirement

Admin panel

1. College admin creates classes in college (Either one by one or import via excel sheet)
    a. College admin adds teachers and students in class. *(already is implemented in system – just shift it to be seen when classes are created)*
2. When teacher logs in admin panel, they only class dashboard;
    a. Teacher can manage (CRUD) uploads to class (Notes, Assignments etc.)

Library panel

3. Student can press class button and view all classes he / she has been added by college admin
4. Student can get in class and see content and open up content profile uploaded by teacher then Read / download – just as in books(already implemented in books).

Extra Information

Teacher content upload format should be same format as in uploading books.

Publisher – set by default as college name

Author – set by default as teacher name

Only remain with relevant fields. Other fields not relevant get removed when teacher uploading classroom content.
